Heating

of Each Home in This Book Presents an Individual Problem

Whenever Homaker is installed in your home, it is with the guarantee that it will heat the home to an average temperature of 70 degrees in the coldest weather.

Homaker has certain fundamental improvements such as large casings and centralized castings which provide ample and uniform circulation on all sides of the fire-pot.

HOMAKER PIPELESS FURNACE

DUST-PROOF GRATE

Note picture. See how easy it is to shake and dump the ashes with Homaker. No need to open ashpit door and no dust or dirt is allowed to escape and work its way up into your home. The neat wooden shaking and dumping handle of Homaker is always in place and always cool and clean.

WILLIAMSON PIPE FURNACE

All the good points in pipe furnace construction established over a period of more than thirty years are embodied in the Williamson Pipe Furnace. In addition to unusually large casings and heavy casings, it also has the dust-proof shaking and dumping device shown above.

Each feature in the Williamson Furnace is backed up by exclusive heating and ventilating experience covering a third of a century.
